

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. RESULTS AND OBSERVATIONS.

1889.

GENERAL SUMMARY.

During the year ending December 31, 1889, the whole number of births recorded in the State was 6,374, of which 3,254 were males, 3,106 females, and 14 unknown. Compared with 1888, the number of births was 161 less, and with 1887, it was 78 less. The difference in the proportion of sexes was 148; in 1888 it was 396.

During the same period the number of couples married was 2,846, 199 couples more than in 1888, when the number was 2,647.

The number of decedents for the same period was 5,514, of which 2,674 were males, and 2,796 were females. Of 44 the sex is not stated.

Compared with 1888, the number of decedents was 261 less, and with 1887, it was 42 greater.

The population of the State by the census of 1880 was 332,286. There was, therefore, during the year, one birth to every 52.1 of the population, against one to every 50.8 in 1888, and one to every 51.5 in 1887. One person in every 58.3 was married during the year, against one to every 62.5 in 1888. There was one decedent to

every 60.2 of the population, against one to every 57.5 in 1888, and one in every 60.9 in 1887.

These figures indicate an increase in mortality in the State during the last year.

The following table groups together the main facts in the registration of births, marriages and deaths during the thirty-three years covered by these reports :

The excess of deaths among females is 122.

CAUSES OF DEATH.

During the year there were 5,429 deaths, 301 less than in the previous year. The causes of death were specified in 5,335 cases,

or 98.27 per cent. of the whole number of deaths. The unknown causes of death number 94, or 1.73 per cent. In 1888 there were 149 unknown causes, or about 2.61 per cent.

The deaths from zymotic diseases were about the usual number. There were 857, or 15.75 per cent. In 1888 there were 878 deaths, or 15.33 per cent. Diphtheria was the most fatal zymotic disease. There were 203 deaths from this cause. Of this number Franklin County had 57 out of 441 deaths; Rutland County, 53 out of 732 deaths; Washington County, 26 out of 468 deaths. There were 178 deaths from cholera infantum against 196 in the preceding year.

From typhoid fever there were 149 deaths. There were 20 less in 1888. From croup there were 76 deaths. In 1888 there were 64.

From constitutional diseases there were 1,049 deaths, about 19.32 per cent. This number is about as usual. Of this class, the number of deaths from diathetic diseases was 341; from tubercular diseases, 728. Of the diathetic diseases, 212 were from cancer. 87 from dropsy. In 1888, 199 were from cancer, 94 from dropsy. Of the tubercular diseases, there were 690 deaths from consumption. In 1888 there were 718 deaths.

From local diseases there were 2,231 deaths, forming 41 per cent. In 1888, there were 2,366 deaths, or about 40 per cent. Of this class the greatest number of deaths was from diseases of the nervous system. There were 666 deaths, 242 being from paralysis, 117 from apoplexy. In 1888 there were 272 from paralysis, 108 apoplexy. There were 437 deaths from heart disease; in the preceding year there were 507. The number of deaths from diseases of the organs of respiration was 589; 474 of these was due to pneumonia. There were 85 less than in 1888.

The deaths from diseases of the digestive organs were 260. In 1888 there were 224.

The deaths from urinary diseases were 213, against 181 in 1888. Of this class 116 were from Bright's disease. In 1888 there were 93.

From old age 426 deaths were recorded. In the year before there were 412.

In the class of violent diseases or injuries, 225 deaths were reported. There were 18 less in the previous year. Of the 225 deaths 198 were accidents, 5 homicides, 22 suicides. In 1888, 174 were accidents, 33 were suicides.

The following table exhibits the diseases which have caused a great part of the mortality during the past three years :

RESULTS AND OBSERVATIONS.

1890.

GENERAL SUMMARY.

During the year ending December 31, 1890, the whole number of births recorded in the State was 6,478, of which 3,328 were males, 3,124 females, and 26 unknown. Compared with 1889, the number of births was 104 more and with 1888 it was 57 less.

During the same period the number of couples married was 2,818, 28 couples less than in 1889.

The number of decedents for the same period was 5,529, of which 2,727 were males and 2,773 were females. Of 29 the sex is not stated.

Compared with 1889, the number of decedents was 15 greater, and with 1888 it was 246 less.

The population of the State by the census of 1890 was 332,323. There was therefore, during the year, one birth to every 51.1 of the population against one to every 52.1 in 1889, and one to every 50.8 in 1888. One person in every 58.9 was married during the year, against one to every 58.3 in 1889. There was one decedent to every 60.1 of the population against one to every 60.2 in 1889.

The following table groups together the main facts in the registration of births, marriages and deaths during the thirty-four years covered by these reports :

Plural Births.—The number of plural births reported for 1890 is 113, against 127 in 1889. Of these 59 were males and 54 females.

Illegitimate.—The whole number of illegitimate births recorded during the year was 62. Of these 36 were males, and 26 females.

Stillborn.—The number for 1890 is 208, as against 231 in 1889. Of these 118 are males and 90 females.

Parentage.—4,907 are recorded as American, 1,418 as of foreign and 75 unknown. In 1889 the number was 4,656 American and 1,586 foreign.

MARRIAGES.

The whole number of marriages recorded during the year ending December 31, 1890, was 2,818; 28 less than the number in 1889. Of the persons married 4,762 are reported as American, and 814 of foreign parentage and 60 unknown. In 1889, 4,629 were of American and 978 of foreign parentage.

DIVORCES.

During the year ending December 31, 1890, the number of divorces granted was 154 as far as reported. The ratio of divorces to marriages was 1 to every 17.32 marriages. The wife was the libellant in 111 cases and the husband in 43.

DEATHS.

The whole number of deaths registered during the year 1890 was 5,529. This is 15 more than the number of deaths occurring in 1889. The average age at death was 42.28.

It will be noticed that some changes have been made in this report. Some of the tables have been omitted which were deemed unimportant and others added which were believed to be valuable. One very important change made is the classification of the causes of death by towns. This enables those interested to study the comparative healthfulness of the different towns in the State, and to the investigation of unusual mortality and cause of sickness in certain towns.

RESULTS AND OBSERVATIONS.

1891.

GENERAL SUMMARY.

During the year ending December 31, 1891, the whole number of births recorded in the State was 6,634, of which 3,387 were males, 3,237 females, and 10 unknown. Compared with 1890, the number of births was 256 more and with 1889 it was 360 more.

During the same period the number of couples married was 2,817, one couple less than in 1890.

The number of decedents for the same period was 5,616, of which 2,805 were males and 2,766 were females. Of 45 the sex is not stated.

Compared with 1890, the number of decedents was 87 more, and with 1889 it was 102 more.

The population of the State by the census of 1890 was 332,323. There was therefore, during the year, one birth to every 49.3 of the population against one in every 51.1 in 1890, and one to every 52.1 in 1889. One person in every 58.8 was married during the year, against one in every 58.9 in 1890. There was one decedent to every 59.1 of the population against one to every 60.1 in 1890.

The following table groups together the main facts in the registration of births, marriages and deaths during the thirty-five years covered by these reports :

Plural Births.—The number of plural births reported for 1891 is 108, against 113 in 1890. Of these 56 were males and 52 females.

Illegitimate.—The whole number of illegitimate births recorded during the year was 67. Of these 47 were males, and 20 females.

Stillborn.—The number for 1891 is 246, as against 208 in 1890. Of these 152 are males and 94 females.

Parentage.—5,023 are recorded as American, 1,543 as of foreign and 68 unknown. In 1890 the number was 4,907 American and 1,418 foreign.

MARRIAGES.

The whole number of marriages recorded during the year ending December 31, 1891, was 2,817; one less than the number in 1890. Of the persons married 4,792 are reported as American, and 813 of foreign parentage and 29 unknown. In 1890, 4,762 were of American and 814 of foreign parentage.

DIVORCES.

During the year ending December 31, 1891, the number of divorces granted was 165 as far as reported. The ratio of divorces to marriages was 1 to every 17.07 marriages. The wife was the libellant in 108 cases and the husband in 57.

DEATHS.

The whole number of deaths registered during the year 1891 was 5,616. This is 87 more than the number of deaths occurring in 1890. The average age at death was 42.07.

It will be noticed that some changes have been made in this report. Some of the tables have been omitted which were deemed unimportant and others added which were believed to be valuable. One very important change made is the classification of the causes of death by towns. This enables those interested to study the comparative healthfulness of the different towns in the State, and to the investigation of unusual mortality and cause of sickness in certain towns.

If the collection of vital statistics and the preparation of the same for publication were placed in charge of the health department, and the registration of deaths made a prerequisite to the granting of burial permits, our registration report would be far more accurate and valuable.

NAMES AND CAUSES OF DEATH.

In the construction of the classification here adopted, use has been made of the results and conclusions of a committee of the Royal College of Physicians of England, (who have been engaged for several years in a revision of the British nomenclature of diseases), as far as such conclusions have been ascertained from brief reports in different medical journals, and from such other sources as were accessible, (the complete report not having yet been issued), and from examination of the classifications in use in different countries in Europe and America.

The statistical nosology consists of two lists of causes of death,

A TABULAR LIST AND SUPPLEMENTAL LIST.

The tabular list comprises the chief or primary cause of death which is used in Table IV in the preparation of this report, and does, therefore, include all those named in the supplemental list, when the final arrangement is completed.

The supplemental list is subordinate to the tabular list, and contains synonyms, or names of related diseases, which may actually, or are supposed to be, causes of death, and which are in addition to those in the tabular list, and which are often found in physicians' certificates of death. These all have a place, in alphabetical order, in Table III., and will be variously grouped under different heads in Table IV., as the figure which preceds each cause in the supplemental list will correspond with the figure of the head in the tabular list under which that cause is placed.

NOMENCLATURE OF CAUSES OF DEATH.

CLASSES.

- I. GENERAL DISEASES....A. Specific and febrile. (*Zymotic*).
- II. GENERAL DISEASES....B. Cachetic. (*Constitutional*).
- III. SPECIAL DISEASES....A. Functional or organic. (*Local*).
- IV. SPECIAL DISEASES....B. Developmental. (*Developmental*).
- V. VIOLENT DEATHS.....From Injuries. (*Violence*).

SUB-GROUPS OR ORDERS.

CLASS I.—ZYMOTIC DISEASES.

Order one, Miasmatic. Order two, Enthetic. Order three, Dietic.
Order four, Parasitic.

CLASS II.—CONSTITUTIONAL DISEASES.

Order one, Diethetic. Order two, Tubercular.

CLASS III.—LOCAL DISEASES.

RESULTS AND OBSERVATIONS. 1892.

GENERAL SUMMARY.

During the year ending December 31, 1892, the whole number of births recorded in the State was 6,558, of which 3,365 were males, 3,187 females, and six unknown. Compared with 1891, the number of births was 76 less and with 1890 it was 80 more.

During the same period the number of couples married was 2,905, 88 couples more than in 1891.

The number of decedents for the same period was 6,197, of which 3,067 were males and 3,093 were females. Of 37 the sex is not stated.

Compared with 1891, the number of decedents was 581 more, and with 1890 it was 668 more.

The population of the State by the census of 1890 was 332,323. There was therefore, during the year, one birth to every 50.6 of the population against one in every 50 in 1891, and one to every 51.1 in 1890. One person in every 57.1 was married during the year, against one in every 58.8 in 1891.

There was one decedent to every 53.6 of the population, against one to every 59.1 in 1891.

The following table groups together the main facts in the registration of births, marriages and deaths during the thirty-six years covered by these reports:
